ABOUT BRADSOL

Leaner. Fitter. Faster.

That's the fitness mantra every individual is trying to adapt to transform himself and lead a healthy & energetic life.

At Bradsol, we help our clients achieve something similar along the Digital Transformation journey. Digital Transformation is today an imperative for organizations to remain healthy and competitive while growing their business in terms of top-line and bottom-line.

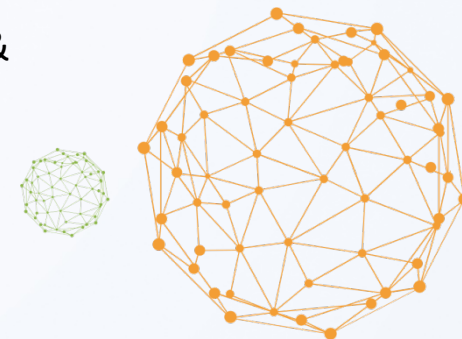

Data driven insights, enhanced customer experience, increased agility and innovation and consolidation

are some of the many benefits that our customers have experienced after engaging us along their journey.

Bradsol has developed an ingenious unique methodology that has proven to deliver visible & vibrant results.

Bradsol DG3.

Digitize. Digitalize. Digitally transform.

What is RPA?

[Robotic Process Automation]

Automation that interacts with a computer-centric process with a software User Interface providing support

RPA configures software that will automate the activities or tasks previously performed by humans

Robotic automation uses a software robot to run application software in the same way that a person works with that software

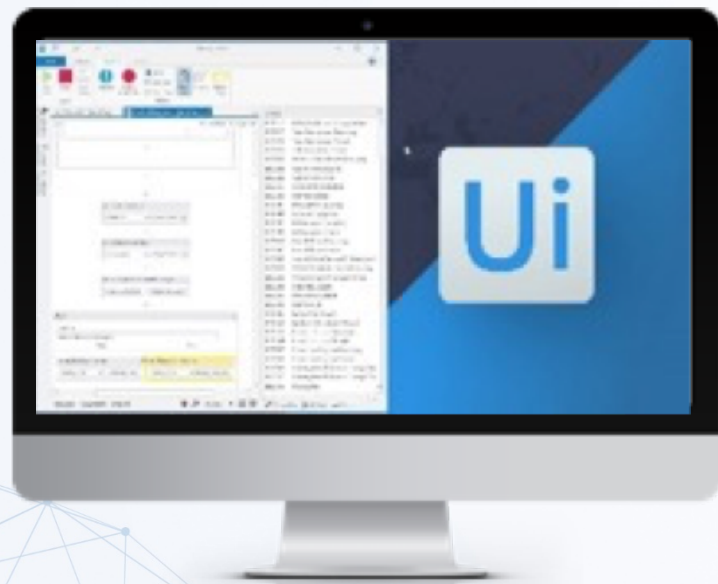

RPA aims to replace repetitive tasks performed by humans, with a virtual workforce. Humans then make judgmental calls, handle exceptions and provide oversight

Digital Transformation Outcomes are Now Real and Immediate

ROBOTIC PROCESS AUTOMATION

Record, program, execute and share!

CUSTOMER OUTCOMES

Accelerate Benefits from Digital Transformation

Improve Customer Satisfaction

Reduce Compliance Cost & Risk

Increase Employee Satisfaction & Engagement

The UiPath Enterprise RPA Platform

UiPath Studio

Digitize your process

Easily create automations in a visual editor across various software applications

→ DEPLOY →

UiPath Orchestrator

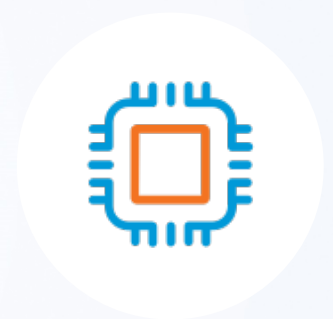

Manage and Secure

Control, monitor, and analyze the performance of your virtual workforce

EXECUTE
Big Scale
MONITOR

UiPath Robots

Deploy and scale

Your attended *and* unattended robots

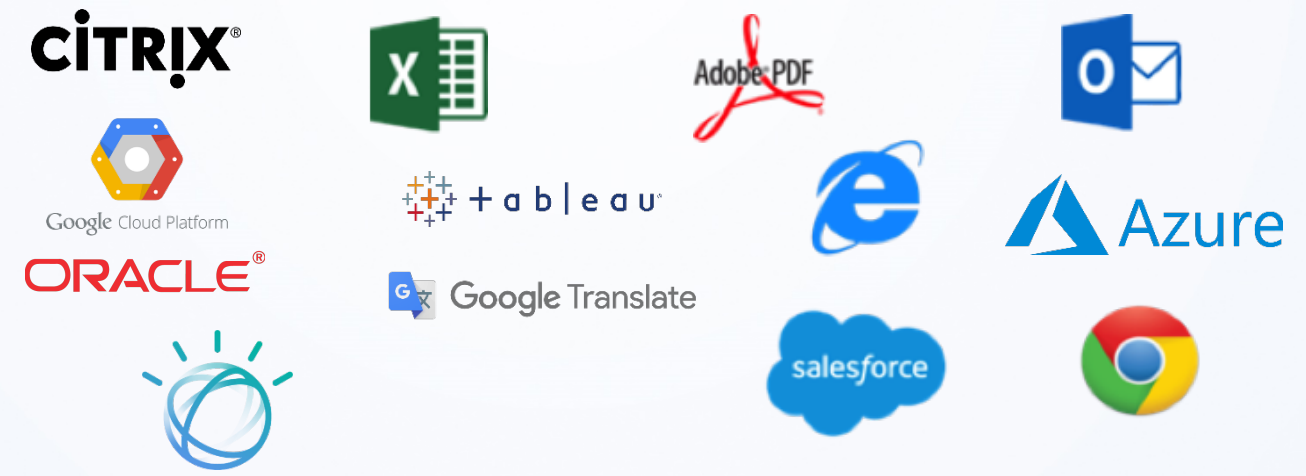

Start with an Easy-to-Use Designer

UiPath Studio

Design your automation visually, with low code
Use built-in recorder, drag & drop widgets and best practice templates to model your robotic processes fast

Over 300 pre-built activities

Prepare to manage, control and secure your automations

UiPath Orchestrator

Control, manage and monitor your entire robotic workforce

Our browser-based server application centralizes in one secure place your entire enterprise operation.

Robot work management features

Transaction Queue

Intelligent Scheduling

Enhanced Exception Handling

Dashboards & Reporting

API Integration

SECURITY AND GOVERNANCE

Access Control

Credential Management

Auditing

Encryption

Deploy Robots for Speed, Scalability and Efficiency

UiPath Robots

Execute automations with perfect accuracy from a desktop, data center or the Cloud

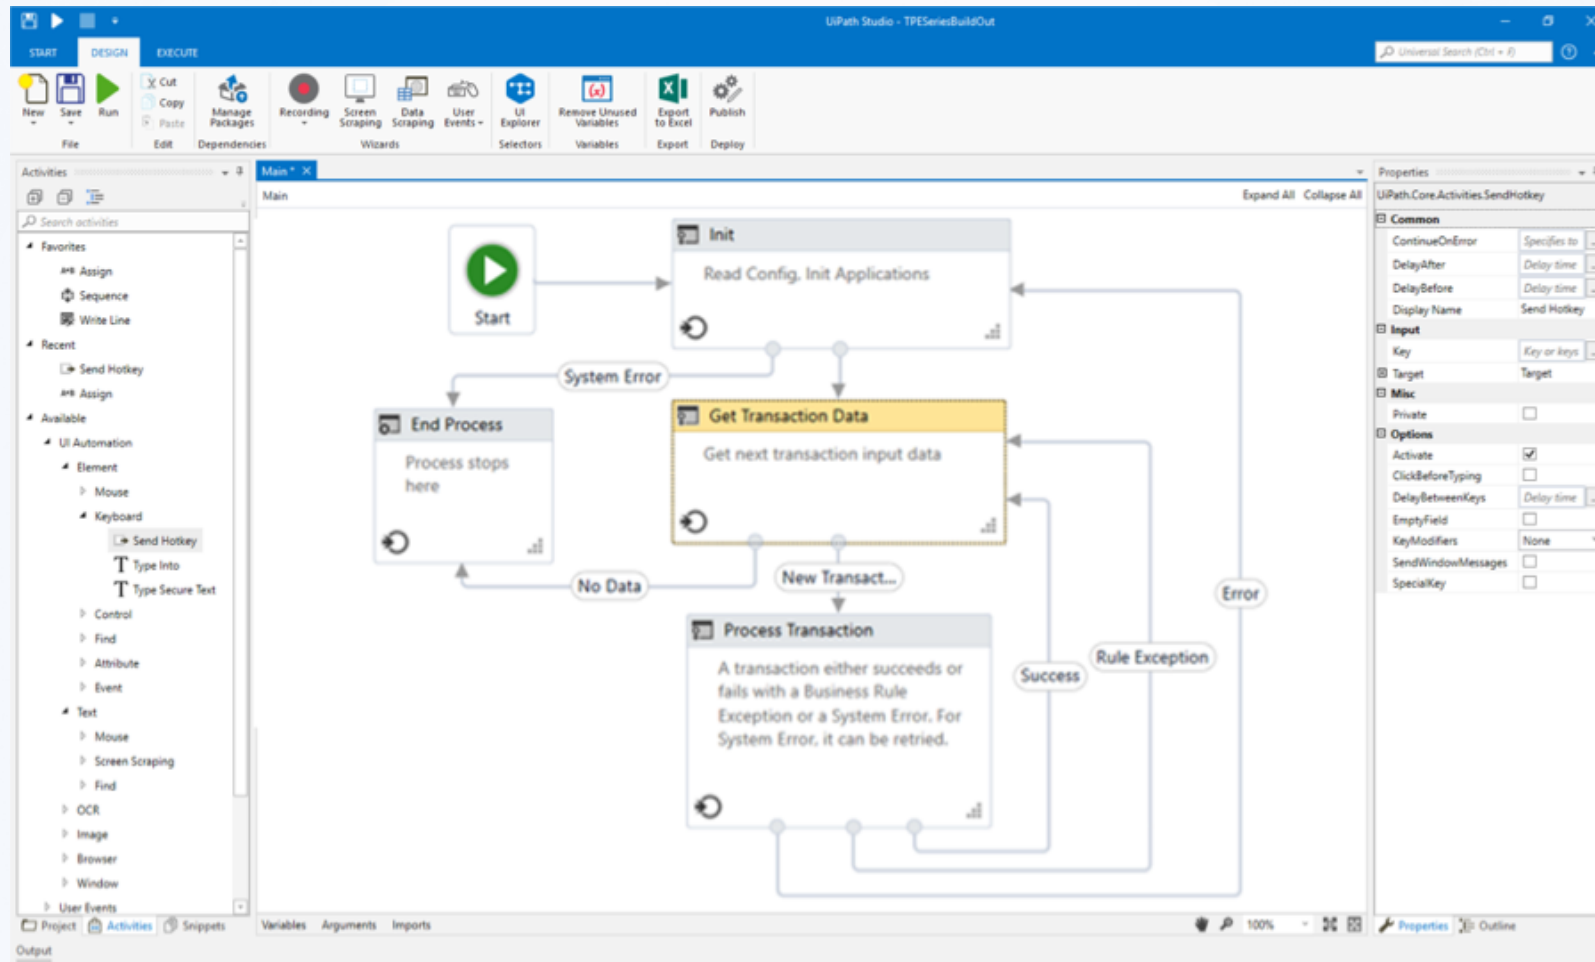

Take over and execute all your processes automatically with perfect accuracy.

Robot types

Attended Robots	Robots that interact with humans on a desktop, often in the "front-office"
Unattended Robots	Robots that execute an entire human function, often in the "back-office"
Hybrid RPA	Automations that combine both attended and unattended tasks

DEMO

Broad and Diverse Use Cases for UiPath Robots

Fortune 1 and World's Largest Company

- Top robot performs the work of 160+ FTEs
- Created 350,000 hours annualized

Global RPA Shared Services Multi-National Global Insurance Leader

- Center
- 25 Entities
- Worldwide Live

Consumer Credit Reporting Agency

- “RPA was not a Cost Play”
- 3x Quality, Speed of Business, Compliance

Largest Credit Union in Florida with \$8.5 Billion in Assets

- Deploys robots to speed lending after Catastrophes
- 11x higher lending following Hurricane Irma

Largest Insurance Company in Italy

- Established RPA Center-of-Excellence
- 12 business units enabled

Technology System Integrator

- HR Robots to speed New Hire On-Boarding
- 80% faster
